- generic: Generic downloader that works on some sites

Note :- This is a list of all extractors that are currently included with yt-dlp. If a site is not listed here, it might still be supported by yt-dlp's embed extraction or generic extractor. Not all sites listed here are guaranteed to work; websites are constantly changing and sometimes this breaks yt-dlp's support for them. The only reliable way to check if a site is supported is to try it.

Pandow is powered by yt-dlp, a powerful open-source media downloader. Not all websites support every type of content (some may support only video, only audio, or specific formats). Some websites may require login, cookies, or authentication for private or age-restricted content.

Support may change over time. For the latest list, visit: <https://github.com/yt-dlp/yt-dlp/blob/master/supportedsites.md>
